

PHOTOSHOP ELEMENTS 10

Memes, Masking & More

» It began with this one vacation photo where we passed a sign that said "GAME CROSSING".

In this era of 21st century literacy - where digital communication skills matter in the classroom and in the workplace - creative visual competency is now relevant in all subjects, not just the arts.

Seems like everyone is sharing photos, music, videos and other work. TATC offers a way to stay ahead of this trend with **"Photoshop Elements 10: Memes, Masking & More"**.

Instructor Kelly Parke

Welcome to the age of digital storytelling, digital scrapbooking and moving beyond words as you learn how to document the best times of your life with flair. Transfer pictures from your camera to your computer, share fun images by creating memes or make good use of photos stuck on mobile devices.

Ramp up your workplace skills with image editing techniques, effects, layering, tagging for syndication and creating a searchable image library. You will walk away with 90 hours of hands-on instruction and a fundamental skillset for manipulating, sharing and displaying images.

Class Schedule

Start Date:
September 14, 2012
Fridays 11am - 4 pm
or possible Saturdays
